

**PREVENATIVE HEALTH CARE FOR PETS
 (Cats)**

Kitten needs:

Vaccines/Deworm

6-8 weeks	10-12 weeks	12 weeks
FVRCP vaccine* Fecal and Deworm	FVRCP vaccine* Deworm	FVRCP vaccine* Fecal and Deworm Rabies**

* FVRCP = Feline Distemper, Rhino virus, Panleukopenia virus

**Rabies vaccine (Required by Alabama State law)

Outside cats are susceptible to Feline Leukemia virus – vaccination optional – recommended for outside cats***

Parasite Control

De-worming every 2 months for the first year

Recommended:

Flea and tick prevention – Beginning at 8 weeks of age - A topical product (like Frontline/Advantage) can be applied at least every 2 months for fleas and ticks. For fleas only - beginning at 14 weeks - Comfortis can be used.

Neutering (spay or castrate) after 5-6 mo of age

Adult Cats:

- 1.) Booster Feline distemper vaccine: First year and then every three (3) years afterwards
- 2.) Booster additional vaccines if used***
- 3.) Rabies vaccine booster annually (Required by Alabama State law)
- 4.) Fecal testing annually - Additional deworming varies based on test
